

You Must Have Known I Needed Love

L.T.D.

I can see in your eyes
I know you care
I spend all of my time
Tryin' to keep you here
Keep you near
Into my empty life
You brought
Joy.joy.joy You brought the best out of me
I can't predict the future
But right now you are all that I can see
In my life
You must have known I needed love
Somehow you must have seen it
You must have known I needed love
I was in distress, you came and freed me freed me
You generate good feelings
My life was a bore
You're what I wanted
You're what I waited for
You made me appreciate my purpose
You really got me feelin' fine
Give my love
Deeper than the surface
You won this heart of mine
You must have known I needed love
Somehow you must have seen it
You must have known I needed love
I was in distress, you came and freed me freed me
Now it seemed so easy
Since you took the time
Goin' out of your way
To please me
That keeps you on my mind
I must admit I was nervous
Never knew what I would find
You put an end to the searchin'
You brought peace to a troubled mind
You must have known I needed love
Somehow you must have seen it
You must have known I needed love
I was in distress, you came and freed me freed me
