

# Sarcastrophe

## Slipknot

Wallow in the winter of it  
Discover what you truly covet  
Underneath and far above it  
You slither in all kinds of Shit  
How could you forget about it?  
Did you think you could minimize?  
This is the age of consent  
You'll get a day in the sun  
Before I kill your fucking lights  
Burn up in your atmosphere  
Burn up in your utmost fear  
Desecrate your temples  
Only hell and hate remain  
Don't look for crows to scatter Prepare for judgment day  
We are kill gods  
The kings are falling down  
Can I find a way to get there?  
Bury your head in the ground  
Will you falsify for your fair share?  
When it's done, it's done  
Plus negative one  
It's everybody's guess but the apathy won  
Will you come testify in the court of myopic opinion?  
Or will you settle for oblivion? We are kill gods (We) We make this world worth saving  
(Are) Are you prepared to believe?  
(Kill) Kill everything that kills you  
(Gods) Live long and die for me Rape crutch and sick  
In the middle of  
An evidence bag that'll never obey  
All these years spent hiding all the bodies I can never be sure but I remember the graves  
We are kill gods  
(We) We make this world worth saving  
(Are) Are you prepared to believe?  
(Kill) Kill everything that kills you (Gods)  
Live long and die for me  
Live long and die for me  
Live long and die for me
