

# Say You Will

Kygo, Patrick Droney & Petey Martin

I remember dancing in the street  
The first time I showed you Springsteen  
Eighteen and hungry  
You told me you love me And us on the hilltop we used to meet  
When the whole world was fast asleep  
Yeah, our fingers they were tracing  
Every constellation that brought you to me The years go by from young to old  
True love travels on a gravel road  
Through lows and highs and highs and lows  
Wherever the wind blows Just say you will love me still  
Say you'll save forever for me  
Say you will love me still  
Say you'll save forever for me  
Say you'll save forever for me I can paint your heart when the colors fade  
And the clock on the wall don't turn the same  
Honey, you'll move me when it ain't like the movies The years go by from young to old  
True love travels on a gravel road  
Through lows and highs and highs and lows  
Wherever the wind blows  
Hey, hey Just say you will love me still  
Say you'll save forever for me  
Say you will love me still  
Say you'll save forever for me Say you'll save forever for me Say you will love me still  
Say you will love me still  
Say you'll save forever for me  
Say you will love me still  
Say you'll save forever for me  
Say you will love me still  
Say you'll save forever for me  
Say you will love me still  
Say you'll save forever for me
