

San Francisco

Dom Dolla

[Chorus]

San Francisco, where's your disco?

San Francisco, where's your disco?[Verse]

I was supposed to go out there?for?like a semester?of college and I ended up?never leaving
It's that energy on the dance floor that I think has helped house music completely thrive from
there

There is definitely the leftover hippie lives from the '60s and '70s I think
It's just a great place to go out, there's something going on every night of the week, the people
there are fun and just

Yeah, I love it[Chorus]

San Francisco, where's your disco?[Verse]

I first moved there in 1999

I was supposed to go out there for like a semester of college and I ended up never leaving
It's that energy on the dance floor that I think has helped house music completely thrive from
there

There is definitely the leftover hippie lives from the '60s and '70s I think
It's just a great place to go out, there's something going on every night of the week, the people
there are fun and just

Yeah, I love it

[Chorus]

San Francisco, where's your disco?

San Francisco, where's your disco?
