

# Spirit

## Future Islands

Trusted, repeated  
Candor, uneven in it's will to find  
The right design  
The form belongs, to no one  
Holding truth Come see me through  
Come through the sea  
To share  
And bare  
The light inside of you Don't cast away, Don't cast away  
Don't let them cast a role for you  
Find the sun, force the moon  
Loose the earth  
For dreams come to those who let them in their guarded room  
Open wide your winged-eye  
Spirit dives--to catch your truth  
For spirit thrives where darkness comes to challenge you Be more than words  
Be more than strength and kind  
Be love and blind  
To those who come to you Sing something new  
Belief is wet and ghost  
Yet, loves the most of what we do() Those winter days  
Those winter nights  
Those days and those nights  
Come see me through  
Come through the sea  
To bare  
And share  
The light inside of you() Challenge you, challenge you  
Challenge You
