

# Apologize

Slim

I got Math down to is science  
English in the bag I could prolly pass without even trying  
The only thing I haven't learnt is how to love you better  
And how to keep them tears from falling  
So if I made you cry, I apologize, let me make it right  
(let me make it right, right)  
This is new to me, what you do to me  
And say you wont leave cuz now I'm Learning love, I'm still learning love  
Learning love, I'm still learning love  
So baby don't you up so easily  
I can make it all right just wait and see  
Learning love, I'm still learning love (still learning love)  
Okay I'm good at economics  
Spanish is a sinch, I can say I love you (oh Te amo)  
The only thing that's kinda hard is reading your mind  
But I know I'll get it if I try  
If I made you cry, I apologize, let me make it right  
(let me make it right, right)  
This is new to me, what you do to me  
And say you wont leave cuz now I'm  
Learning love, I'm still learning love  
Learning love, I'm still learning love  
So baby don't you up so easily  
I can make it all right just wait and see  
Learning love, I'm still learning love (still learning love)
