

# We Could Be In Love

Lea Salonga

Be still my heart Lately its mind is on its own  
It would go far and wide  
Just to be near you  
Even the stars shine a bit  
Bright I've noticed  
When you're close to me  
Tell me how  
Still it remains a mystery  
Anyone who seen us  
Knows what's going on between us It doesn't take a genius To read between the lines  
And it's not just wishful thinking  
Or only me who's dreaming  
I know what these are symptoms of  
We could be in love  
I ask myself why I sleep like a baby through the night  
Maybe it helps to know  
You'll be there tomorrow  
Don't open my eyes, ohh  
I'll wake from the spell I'm under Makes me wonder how, tell me how? I could live without you  
now  
And what about the laughter  
The happy ever after  
Like voices of sweet angels  
Calling out our names  
And it's not just wishful thinking  
Or only me who's dreaming  
I know what these are symptoms of  
We could be in love All my life I have dreamed of this  
But I could not see your face  
Don't ask why two such distant stars  
Can fall right into place  
Anyone who seen us  
Knows what's going on between us It doesn't take a genius  
To read between the lines, ohh  
And it's not just wishful thinking  
Or only me who's dreaming  
I know what these are symptoms of  
We could be in love  
Oh, it doesn't take a genius  
To know what these are symptoms of  
We could be, ohh  
We could be, we could be in love

We could be in love
