

# Down from the Sky

## Trivium

A chasm grows  
With the cavity of serpentine teeth  
(Serpentine teeth)  
Hunger pain strike  
For the sweet feast of innocent blood  
Of innocent bloodshed Now here we go  
The vampires feed on the wars of mankind The vampires feed on the wars of mankind  
Growing fat on the throne of an empire Tyrant rules with the threat of a great fire  
I've opened up my eyes  
Seen the world for what it's worth  
Tears rain down from the sky  
They'll blow it all to bits  
To prove whose god wields all the power  
Fire rains down from the sky  
The gaping wounds  
Hemorrhaging the blood from which they feast+  
(Blood from which they feast)  
Eat us alive  
Consume to feed a hunger with no A hunger with no end  
Let's fucking go The vampires feed on the wars of mankind  
The vampires feed on the wars of mankind Growing fat on the throne of an empire  
Tyrant rules with the threat of a great fire  
I've opened up my eyes  
Seen the world for what it's worth  
Tears rain down from the sky  
They'll blow it all to bits  
To prove whose god wields all the power  
Fire rains down from the sky  
This battle's not the same Which they have led us to believe  
A synthesis of propaganda Terror and deceit  
We are the cattle  
They the slaughter  
Our meat: gasoline They pump us through the machine's valves  
To cleanse the world's "disease" We are the ammunition  
That will cause all life to cease Annihilate  
All those who stand in their way  
Obliterate  
They'll rain their holocaust  
Down from the sky  
(Lead - Matt) The vampires feed on the wars of mankind The vampires feed on the wars of  
mankind  
(Lead - Corey)

Growing fat on the throne of an empire  
Tyrant rules with the threat of a great fire  
I've opened up my eyes  
Seen the world for what it's worth  
Tears rain down from the sky  
They'll blow it all to bits  
To prove whose god wields all the power  
Fire rains down from the sky  
Annihilate  
All those who stand in their way  
Obliterate  
They'll rain their holocaust  
Down from the sky...
