

# Noise

## Cody Johnson

I can hear those trucks on the highway tonight  
I can hear those kids down the block playin' ball  
I can hear the drone of my boss in my head  
Sayin' "This weekend I need you on call"  
The volume's up, the pressure's on, the phone is buzzin'  
You're the only reason that I don't go crazy 'Cause when we kiss, the world outside is gone  
And whatever lonely there is moves on  
My heart doesn't have any choice  
When I hear my name on your voice  
Everything else, everything else is just noise  
Your eyes cut through every distraction  
Through the rage of the machine and the roar of the engines  
This rock keeps turning, this city don't sleep  
You're my secret shelter when I can't find peace  
The way you touch, the way you whisper  
Way you love and how it lingers  
You can make it all go away 'Cause when we kiss, the world outside is gone  
And whatever lonely there is moves on  
My heart doesn't have any choice  
When I hear my name on your voice  
Everything else, everything else is just noise  
'Cause when we kiss, the world outside is gone  
And whatever lonely there is moves on  
My heart doesn't have any choice  
When I hear my name on your voice  
Everything else, everything else is just noise  
Everything else is just noise
