

Last Time

Fuel

I'm not the first you've shut down
I drank your pleasures low
I stumbled, out from your bed
But still I'll come for you tonight
Choke my faith and stab my pride
Tell myself that This is the last time
This is the last time
This is the last time now
I bleed for you
I bleed for you
Preservation or predation
Is it really? I don't know
Crumbled I spill out of your head
I want to fall
And you see it all
And you just laugh when I say This is the last time
This is the last time
This is the last time now
I'll bleed for you
I'll bleed for you
And everything I feel I know you know
And everything that heals I know you know
And everything that steals I know you know
And everything that kills you know
And tell myself that This is the last time
This is the last time
This is the last time now x5
