

I Do This for You (feat. Marlene)

Giorgio Moroder

Look at me down to every pixel
Do you really get the whole picture?
Watching 3D, color by color
There's more than all this pretty
If you looking better, cover I do this for you
I only do this for you
I do this for you
I only do this for you Can you say me I'll go down later
I'm not hiding under no filter
I set my heart on fire
To make my love shine brighter
I give it only if you ready to take it
I do this for you
I only do this for you
I do this for you
I only do this for you
I do this for you
I only do this for you
I do this for you
I only do this for you I give it all and turn it inside out
I'm giving up if you don't know right now
Your everything I see
Why don't you see me?
You know I really need
Is you to need me
I do it, I do it, I do it, I do it
I do this for you
I only do this for you
I do this for you
I only do this for you
I do this for you
I only do this for you
I do this for you
I only do this for you I do this for you
