

Do What the Night Wants

Brantley Gilbert

So we are trying to play our cards right
But i aint never liked playing by the rules
I should probably take you all night
Well i dont know about you
Baby i got a little wild side
(You got a wild side too)
And i dont want to say good night
I want to howl at the moon
Do what the night wants
Shut the lights off
Let the moon light lead the way
Stay off the main roads
Crank up the radios
Man they take all our cares away
And if you want i can take it home buddy
If you dont want to be alone
Lets do what the night wants
Baby girl i know your curious
So i might as well get it out the way
I aint trying to steal on you girl
I know youll make it worth the wait
I want to know you a little more
(Make you want to know me too)
I can walk you to your front door
And we can howl at the moon
Do what the night wants
Shut the lights off
Let the moon light lead the way
Stay off the main roads
Crank up the radios
Man they take all our cares away
And if you want i can take it home buddy
If you dont want to be alone
And do what the night wants
Lets do what the night wants
We can look up in the morning
Shootin boons out at the sun rise
Yea but right now in this moment
Lets let it ride
And do what the night wants
Hell yea, what do you say baby
Lets do what the night wants

Shut the lights off
Let the moonlight lead the way
Stay off the main roads
Crank up the radio
And let it play all our cares away
And if you want i can take it home buddy
If you dont want to be alone
Lets do what the night wants
Yea, lets do what the night wants
