

Bravo

The Internet

My love, I thought you knew
This common thing, don't pick and choose
So every time that you perform
I learn just a little more
What a waste, babe, what a shame
You were just playing games
Words come out your mouth
Look around, what a mess you made
Watching from the crowd, it's astounding
You're on your way
Thought that you had changed
I found out it's just a role you play
Well bravo, baby
Bravo, baby, oh
My love, let's get this straight
This ain't your show, this ain't your stage
So no more standing ovations brought
[?]Well played, baby
Save it for the main stage, baby
Go back to where you came from, came from
Words come out your mouth
Look around, what a mess you made
Watching from the crowd, it's astounding
You're on your way
Thought that you had changed
I found out it's just a role you play
Well bravo, baby
Bravo, baby, oh
Ooh yeah
Ooh yeah
