

From That Place

Jasper Sawyer

I'm not the type that's gotta have someone
I'm not the type that's gotta be in love
Had a lot of people come and go
And plus anyway I'm used to being solo But it was good when you came to me
You were the one to make me believe
That life could be better
That we could get by together, come Come, come sit down
Let's celebrate this love we've found
Cause we know, this is real
I'm about to let you know, I gotta to let you know that Few can relate to what I've been through
So baby I'm glad I found you
You make me smile, you like good food
You're from that place, you're from my place
Few can relate to where I'm going
But I can take you anywhere, you know it
Aw you make me laugh, you like good food
You're from that place, you're from my place Get your clothes and let's take a drive
True love's coming back in style
We'll be riding to my song, Pretty Pretty
There ain't nothing going wrong, really, really So good when you came my way
You keep me laughing almost everyday
Life can't be better
As long as we stay together, come Come, come sit down
Let's celebrate this love we've found
Cause we know, this is real
I'm about to let you know, I gotta to let you know that
Few can relate to what I've been through
So baby I'm glad I found you
You make me smile, you like good food
You're from that place, you're from my place Few can relate to where I'm going
But I can take you anywhere, you know it
Aw you make me laugh, you like good food
You're from that place, you're from my place We be eating hamburgers and fries
We be up watching movies all night
We aint riding on twenty twos
We saving our money, we saving our money yeah We be eating ice cream and cake
We going through life like it's our birthday
We aint riding on twenty twos
We saving our money, we saving our money Few can relate to what I've been through
So baby I'm glad I found you
You make me smile, you like good food
You're from that place, you're from my place Few can relate to where I'm going

But I can take you anywhere, you know it
Aw you make me laugh, you like good food
You're from that place, you're from my placeCome baby meet my family
We about to throw a party
They know you're like my family
So you better be at this partyCome baby meet my family
We about to throw a party
They know you're like my family
So you better be at this partyFew can relate to what I've been through
So baby I'm glad I found you
You make me smile, you like good food
You're from that place, you're from my placeFew can relate to where I'm going
But I can take you anywhere, you know it
Aw you make me laugh, you like good food
You're from that place, you're from my placeLyrics added by: Mahesh Reddy
