

# Washing Away Me In the Tides

## Trivium

Disgusted with what I see  
So many pieces left of you and me  
Glass falls like rain  
I'll crucify you for this pain... for this pain  
Tonight I leave this town  
In love I'd burn it all down  
To the ground you're nothing to me  
To the ground you're fucking killing me  
Abandon all hope washing away me in the tides  
Unclenching the fists made round my neck accepting the end  
Longing to see your face  
So my hand can form into a mace  
Everything smells of you  
Even the gasoline that covers you
