

# I Heard Goodbye

Dan + Shay

I could tell by the way you kissed my lips that day  
There was something missing, something not the same  
You were there, but you weren't, didn't care, didn't hurt at all  
Said it was what it was, then the feeling of us was gone I watched you fade away  
But I turned my head and closed my eyes  
And prayed you'd stay  
And I told myself that it'd be fine  
I wish I could have just said somethin' oh  
When you said you needed time  
I heard goodbye  
Goodbye

It was way too easy to say those words you said  
And the look on your face, I could tell there was nothin' left  
Almost wished we were fightin', screamin', and cryin', but  
Not a drop of a tear, didn't know how to feel, I was numb When I watched you fade away  
But I turned my head and closed my eyes  
And prayed you'd stay  
And I told myself that it'd be fine  
I wish I could have just said somethin' oh  
When you said you needed time  
I heard goodbye

Goodbye I could try to hold on if I thought I could change your mind  
But I don't think I can when I feel like I feel tonight  
I watched you fade away  
But I turned my head and closed my eyes  
And prayed you'd stay  
And I told myself that it'd be fine  
I wish I could have just said somethin' oh  
When you said you needed time  
When you said you needed time  
I heard goodbye  
Goodbye
