

# Beautiful Death (feat. Punch & Ashtrobot)

## Ab-Soul

My only fear is fear itself  
I ain't afraid to die, more afraid of myself  
Niggas looking at me like I don't hear myself  
Like I don't know pain, I been here myself  
This life will drive you crazy  
Only if you let it  
I'm just an American expressing, give me some credit  
Won't be surprised if before I rise, I'm beheaded  
These are the days of our lives  
Nightmares of a thief coming, taking my life  
I go to sleep thinking I may never wake up  
In this reality, at least I keep my bed made up  
I just wish they all could see what I can see  
If we could stop it with the violence  
and apply a lil' logic I believe  
We could thrive to be a promising civilization  
We may die individually, but as a nation  
We'll rise, nigga, change lives, nigga  
Break ties from the everyday lies, nigga  
It's not time, until it's our time  
Don't be so afraid to die  
Until it's our time  
Don't be so afraid to die  
It's our time, til it's our time  
Cause we'll never die  
All I see is confusion and chaos  
Blatant disorder, authorities picking on the minorities  
Unfortunately, the land of the free has little to offer me  
And got me often thinking about offing me  
I wake up in the morning and I ask myself  
Is life worth living, should I blast myself  
I'm tired of being broke and even worse  
The upper class acts like they don't want me on this Earth  
This life will drive you crazy  
Only if you allow it  
That's only if you a coward and you're sure to get devoured  
To no avail, tuck your tail, and all you do is give them power  
Who's gonna take a stand, who's gonna be a man  
Who do you work for, please help me understand  
You could be the victor in a situation  
We may die individually, but as a nation  
We'll rise, nigga, change lives, nigga

Break ties from the everyday lies, nigga  
It's our time, until it's our time  
Don't be so afraid to die  
Until it's our time  
Don't be so afraid to die  
It's our time, til it's our time  
Cause we'll never die  
Pardon my immortality  
I'm Martin Luther shooting back on the balcony  
Escaping the Lorraine until they call in the cavalry  
Alpha 184, oh Lord, nobody blast for me  
If it takes me to be a martyr to push the envelope farther  
Nigga show me to the slaughter  
I gladly sacrifice what is percieved  
Sow my seed, so my seed can live its dreams  
My spittin' image, see my stitching in his genes  
According to my likeness, his breath of life is priceless  
My enlightenment's the ancient Chaldeans  
Penetratin' America's culture, to its very being  
It's not political though, it's more critical  
Spiritual warfare, you can murder me in the physical  
But I advise y'all to keep me alive  
In the event of my demise, I'll be bigger than life  
Beautiful death, nigga  
Tragedy after tragedy, I know it's sad to see  
America killing her babies like Casey Anthony  
We try, we try to cope and hold on to our sanity  
Popping ecstasy will surely shorten life expectancy  
We travel the seven seas in hopes for a little peace  
We promised pie in the sky, I'm dyin' to get a piece  
Put down your piece, I wish you all a beautiful death  
Peace
