

Flying V

They Might Be Giants

Flying V

If you're standing underneath it, you will see when you inspect it

That a flying V is made of flying geese

The pointed end flies in the lead

So when it flies, it's hard to read

You've got to tip your head to see

Flying V, Flying V It's a V

In the window of a music store, or on stage at a rock show

Now a flying V is made of a guitar

The pointed end flies in the lead

So when it flies, it's hard to read

You have to be upside-down to see it
