

Your Lovin' (feat. MØ & Yxng Bane)

Steel Banglez

Steel Banglez

(Banglez, Banglez)Told you my secrets, you told me your flaws

Oh, yeah

So when you listened I accepted them too

Told me you loved me, put my heart on pause

'Cause as this place I can't keep fighting for you

So why don't you talk to me, talk to me?

Say anything

'Cause I know once you talk to me, talk to me

We'll be OKSo how the fuck did we get here?

'Cause I can't recognise us no more

Tell me your love it still lives here

I'm standing knocking outside your door

Your loving, come give me your loving

Dance on me

You've got that one something

Your loving, come give me your loving

Dance on me

You've got that one something that I'm deep in

That's something I believe in

That's something that I'm needing

That's something that I'm wantingYou gotta twist it like it's all my fault, darling

Swallow your lies now I speak you the truth

If I had a penny for all your talk

I'd be rich as fuck and miles from you

Don't need you to say you'd die for me, die for me

Boy, save your breath

'Cause all this time you ain't had time for me, time for me

And now you care

So how the fuck did we get here?

'Cause I can't recognise us no more

Tell me your love it still lives here

I'm standing knocking outside your doorYour loving, come give me your loving

Dance on me

You've got that one something

Your loving, come give me your loving

Dance on me

You've got that one something that I'm deep in

That's something I believe in

That's something that I'm needing

That's something that I'm wanting, yeahI can't get away from you babe

You're always on my brain

Be done with all my games
I can't get away from you
I learned this from you
Love's an option you choose Your loving, come give me your loving
Dance on me
You've got that one something
Your loving, come give me your loving
Dance on me
You've got that one something
Your loving, come give me your loving
Dance on me
You've got that one something that I'm deep in
That's something I believe in
That's something that I'm needing
That's something that I'm wanting, yeah Steel Banglez
(Banglez, Banglez)
