

# For a Better Day

Avicii

Hurt  
On caution weep  
With bleeding sky  
I called your name  
There was no one there  
And in the cold and snow  
I saw your face I sang the song for the little things  
Magic call, but the joy you bring  
Running it down the line  
Wish you could find that love is a fragile thing  
Magic call from a pretty thing  
Maybe it might be time  
For a better day  
For a better day  
For a better day  
Straight, from the path of love  
In the road of life  
I tumble forward  
But going on, I'mma keep it strong  
I saw your face I sang the song for the little thing  
Magic call, but the joy you bring  
Running it down the line  
Wish you could find that love is a fragile thing  
Magic call from a pretty thing  
Maybe it might be time  
For a better day  
For a better day  
For a better day  
For a better day  
For a better day  
For a better day  
I sang the song for the little thing  
Magic call, but the joy you bring  
Running it down the line  
Wish you could find that love is a fragile thing  
Magic come from a pretty thing  
Maybe it might be time  
For a better day
