

Halfway To Hell

Sheppard

Down in the depths of the deepest darkest well
All of the wicked suffer where we fell
You know we loved you before you cast your spell
But it's a long way back when you're halfway to hell
All that is left here is the darkness of the night
Where do you run to when you're banished from the light
We could fall without a fight or we could try to make it right
But the rugged road of glory is hardly in our sight
It's a long way back, it's a long way back
It's a long way back when you're halfway to hell
All the people in between are closer than they seem
All the people in between are closer than they seem
All the people in between
Well we all crave the power and now we're eating dirt
When it comes to evil, money's such a flirt
We're all living in the ground without a clue, falling down
And it's harder to breathe when there's earth in your mouth
It's a long way back, it's a long way back
It's a long way back when you're halfway to hell
All the people in between are closer than they seem
All the people in between are closer than they seem
All the people in between
Sinking deeper into war
Singing freedom as we fall
Time to make a call, we're on our knees
Once the truth is bent, we'll start our decent
An ince a time for every lie
Before we know it, we can barely see
All the people in between are closer than they seem
All the people in between are closer than they seem
All the people in between
