

The New Generation

[Robin Thicke](#)

Things are really changing
From Africa to Asia
To Europe across the sea
Everybody got his head up
Ain't nobody on his knees
And the . start flying
And the days under the quite sky
And we stay and wonder
Under the biblical .
Like it used to be
Cause it is better than it was
With a new generation
We believe in us
We believe in us
We believe in us
(we are the new generation)
Now we are sharing our money
Now we are helping .
Now we are calling our bother saying I apologies
Love is stronger . baby's eyes .
You want a glass of champagne
You wanna play . national anthem
For all the . died in vein . international inspiration
Number one most trendy . stop flying
