

Right Place Right Time

[Olly Murs](#)

We got our eyes wide open and feeling like we are almost there.
Words unspoken disappearing in the air
And all I see is you and I
You're the only lifeline that I need tonight
I'm letting go. So this is what it feels like
Be in the right place the right time
I'm hangin on for dear life
Hoping we can make this a long night
This is why we came yeah I can feel it in my veins, hey yeah
So this is what it feels like
Right place the right time
Loud explosions only you and I can hear
Doors fly open, you're the cure for all my fears
And all I see is you and I
And you're the only lifeline that I need tonight
I'm letting go. So this is what it feels like
Be in the right place the right time
I'm hangin on for dear life
Hoping we can make this a long night
This is why we came yeah I can feel it in my veins, hey yeah
So this is what it feels like
Right place the right time with you
Right place the right time with you
Right place the right time Right here and now feels like forever
Never touch the ground when we're together
Right here and now feels like forever, forever, forever, forever
So this is what it feels like
Bein in the right place the right time
I'm hanging on for dear life
Hoping we can make this a long night.
Right place the right time
Right place the right time Right here and now feels like forever
Never touch the ground when we're together
Right here and now feels like forever
Right place the right time.
