

Watch Me Work

Melanie Fiona

Sick of boarding every place you wanna scream and shout
Feeling like it's time to change, get a little wild
Come up from behind the shade, be the rebel child
Gonna race them hell tonight Cause it's alright, for you to be afraid
There's a spotlight, that's shining just for you
Go the distance, that you want really made of Watch me work, something different, something
new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work Set the status gonna replace, let them other burn
Show them that you're here to stay, tell them watch and learn
Time to put the wheels in motion, never to return
Get on with myself tonight
Cause it's alright, for you to be afraid
There's a spotlight, that's shining just for you
Go the distance, that you want really made of Watch me work, something different, something
new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work Time to break free from these chains
I'm on a mission, wanna live my life today
I thought I told you, I'm taking over
Talk it's cheap so it's back to if I should work Watch me work, something different, something
new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work
Watch me work, something different, something new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work
