

# Chemistry of a Car Crash

## Shiny Toy Guns

You're waking up  
A part of me I've never known  
And I've never felt so invincible  
What took you so far away? You're lost for tonight again  
That's what you wanted  
Your arms to your side again  
Again Just take away the words I say  
'Cause I know that you don't feel the same  
Just go and say what's in your head  
And I won't try to stop you  
You hold the rights I'll never own  
And I've never felt so alien  
Don't tear us apart again What is the use of it  
We? re okay, it's nothing  
It's all chemistry of a car crash Just take away the words I say  
'Cause I know that you don't feel the same  
Just go and say what's in your head  
And I won't try so you'll stay This time I won't try and I won't change  
This time I won't try to stop you  
It's all chemistry of a car crash  
Just take away the words I say  
'Cause I know that you don't feel the same  
Just go and say what's in your head  
And I won't try so you'll stay This time I won't try and I won't change  
This time I won't try to stop you
