

Washington Is Next!

Megadeth

The quiet war has begun with silent weapons
And the newest slavery is to keep the people
Poor and stupid, "Novus Ordo Seclorum" How can there be any logic in biological war?
We all know this is wrong, but the New World Order's
Beating down the door, oh something needs to be done There was a king, an evil king
Who dreamt the wickedest of dreams
An ancient mystery, no prophet could interpret
Of seven years of famine, the wolf is at my door
As predicted years ago, that that was, that is, that is no more
The word predicts the future and tells the truth about the past
Of how the world leaders will hail the new Pharaoh
The eighth false king to the throne; Washington is next!
Disengage their minds, sabotage their health
Promote sex and war, and violence in the kindergardens
Blame the parents and teachers; it's their fault, "Annuet Coeptis"
Attack the church dynamic, attack the family
Keep the public undisciplined till nothing left is sacred and
The "have-nots" get hooked and have to go to the "haves" just to cop a fix I am the king, an evil
king
Who dreams the wickedest of dreams
An ancient mystery, nobody could interpret
Of seven empires falling, the wolf is at my door
As predicted years ago, that that was, that is, that is no more
The word predicts the future and tells the truth about my past
Of how the world leaders are waiting to usher in
The eighth world power of modern Rome; Washington is next!
There was a king, an evil king
Who dreamt the wickedest of dreams
An ancient mystery, no prophet could interpret
Of seven empires fallen, the wolf is at my door
As predicted years ago, that that was, that is, that is no more I am a king and I dream the wildest
dreams
And nobody could interpret
Seven empires falling, the wolf is at my door
Ooh, that that was, that is, that is no more
There's something at my door, some ancient mystery
The future tells the truth about the past
And I'm the eighth false king to the throne
I've got you in my crosshairs, now, ain't that a bitch?
Washington, you're next!
