

Medication (feat. Stephen Marley)

Damian "Jr. Gong" Marley

Medication - your medication makes me high Just be patient - I'm like
a patient trying to find Levitation - Run your fingers down my spine
Elevation - your medication makes me high,
yeah Such a short way up and such a long way down Chalice it a bubble
like we deh a Ray Town Di way yuh sup'n nuff it haffi way by pound
Inna fields of marijuana that is my playground I love you Mary Jane!
You're the prettiest of flowers,
girl me can't complain When I'm with you I feel so high I rise above
the rain And you no do people damage,
like that bitch cocaine, no And leave them lonely, feeling only pain
Cause your DNA is of the highest strain
Your effect is so potent, it's so insane
You so gummy and sticky like a plaster stain
When me grind out your body, only stems remain
And to love you is so risky,
I might get detained You always keep me flying on
the highest plane And anybody know, will always proclaim
Medication - your medication makes me high Just be patient - I'm like
a patient trying to find Levitation - Run your fingers down my spine
Elevation - your medication makes me high,
Your leaves of green,
your purples and blue Has cured little kids, and old women too
And I say to myself, what a wonderful herb And I say to myself,
what a wonderful herb Look how
Babylon so duppy, dem fight you fi years
Fi your love whole heap a man serve years Babylon so duppy,
dem fight you fi years And now the whole a dem a buy shares You
should be a celebrity,
amongst any tree Across the seven seas,
for your energy But you're an enemy, catching felonies
Of the remedies in your recipes, whoa
Medication - your medication makes me high Just be patient - I'm like
a patient trying to find Levitation - Run your fingers
down my spine Elevation - your medication makes me high, hey
Ask me how you feel, splendid indeed
With a likkle bit a black splendid weed
A purest grow indoors, not a stick nor seed
And she never force ripe, it was a real slow speed
No fertilizer, natural baby feed
No cross pollination,
she's a real pure breed Cultivated
in love and she's not grown for greed

She's everything I want and also all I need Medication - your
medication makes me high Just be
patient - I'm like a patient trying to find
Levitation - Run your fingers down my spine
Elevation - your medication makes me high, hey
