

Fall Asleep

Jars of Clay

We wandered off like children in the woods
And let the searchers come but never find us
Tried to make a life among the trees
While your dreams collected planes and cars and cities
You slipped away from me while I was
sleeping
To climb the tallest oak and see the lights
Your dissatisfaction gave you questions
Do you remember what the city sounded like?
Do you remember what the city sounded like?
So stay up with me, don't fall asleep
Because we only have this moment once in our lives
The next time we'll meet under city lights
But we're here tonight, so let's make it all it was meant to be
So I held you but the call was from
inside
And I knew I couldn't keep you if I tried
But I watched as the distance spread, as the shadows grew
And the longings came like wolves to devour you
So stay up with me, don't fall asleep
Because we only have this moment once in our lives
The next time we'll meet under city lights
But we're here tonight, so let's make it all it was meant to be
So stay up with me, don't fall asleep
Because we only have this moment once in our lives
The next time we'll meet under city lights
But we're here tonight
So stay up with me, don't fall asleep
Because we only have this moment once in our lives
The next time we'll meet under city lights
But we're here tonight, so let's make it all it was meant to be
Let's make it all it was meant to be
Let's make it all it was meant to be
