

# Higher Than This

Ledisi

Light that reflects in the mirror  
Showing the essence of who I am  
Made from pure perfection  
I'm connected to the one, therefore I am One to rise above all the ugliness  
Evolve into a world of selflessness  
I can see love and no love can be higher than this  
What can be higher than this? What can be higher than this?  
What can be higher than this?  
What can be higher than this?  
You will find love, and no love can be higher than this Feeling like everything going wrong  
Take a step back and edit yourself  
There's a hero in you waitin' to happen  
Make the choice to take a chance and save yourself  
You gotta let go of your insecurity  
Explore the passion in your possibilities  
You will find love and no love can be higher than this  
What can be higher than this? Love, ain't nobody love me like you do  
So I gotta tell the world that  
You are in everything that I do Ain't nobody love me like you do  
There's no love more higher than this  
What can be higher than this?  
Uh, uh, higher than this I need someone to tell me  
'Cause I don't see nothing else more  
(Uh, uh, uh, uh, higher than this)  
Don't nobody know the love that I feel right now  
What can be higher than this?  
There's no love more higher than this  
What can be higher than this?  
You will find love See all you got to do is just let him in  
(You will find love)  
Anything you dream of is gonna to happen  
(You will find love)  
Just let it go There's no love more higher than this  
What can be higher than this?  
Love, ain't nobody love me like you do  
So I gotta tell the world that you are in everything that I do Ain't nobody love me like you do  
There's no love more higher than this  
What can be higher than this?  
What can be higher than this? What can be higher than this?  
What can be higher than this?  
What can be higher than this?  
What can be higher than this? What can be higher than this?

What can be higher than this?  
What can be higher than this?  
What can be higher than this?
