

# Our Love

[Ali Campbell](#)

Our love

We made love just by looking at each other  
And we were so involved that nothing else mattered  
We made love appear all around and everywhere  
No one else was there, and we didn't really care  
Our bed, like a Island in the night  
And I, your soul companion  
And we, can share till morning light  
A love, you know you can rely on  
We made love from nothing when was enough  
And everyone around us tried to call our bluff  
Nothing that no one could come between us  
We were so sure, two young sweet dreamers  
Our bed like a Island in the night  
And I your only companion  
And we can share till morning light  
A love you know I can rely on  
Are we the only ones who, love like this  
Wrapped up in each other, locked in a kiss  
Your my perfect lover and I'm, yours you insist  
We aim for perfection and, we never miss  
Our bed, like a Island in the night  
And I your soul companion  
And we, can share till morning light  
A love, you know you can rely on  
Our bed, like a Ireland in the night  
And you, my only companion  
And we, can share till morning light  
A love, you know you can rely on  
Our bed, like a Island in the night  
And you, my only companion  
And we, can share till morning light  
A love, you know you can rely on
