

# Longest Night

## Howie Day

Is it dark where you are?  
Can you count the stars where you are?  
Do you feel like you are  
A thousand miles from home? Are you lost where you are?  
Can you find your way when you're so far?  
Do you fear where you are?  
A thousand nights alone So here we are set into motion  
We'll steal a car and crash in the ocean  
You and I are caught in a fading light  
On the longest night  
It's enough just to find love  
It's the only thing to be sure of  
So hard to let go of  
A thousand times or more I was close to a fault line  
Heaven knows you showed up in time  
Was it real?  
Now I feel like I'm never coming down So here we are set into motion  
Steal a car, crash in the ocean  
You and I caught in a fading light  
On the longest night I recall when we were together  
Even now it seems like forever  
So alive caught in a fading light  
On the longest night  
Can we go too far to find what is waiting here?  
A little fall from grace on the longest night  
Did we go too far to find what is waiting here?  
We'll take a little time to open up again Is it dark where you are?  
Can you count the stars where you are?
