

Alive (Nightmare) [feat. Ratatat]

Kid Cudi

Everytime, the moon shines I become alive, yeah
And everytime, the moon shines I become alive, yeah I'm feeling strange in the night
I'm in myself I feel I'm thrown into a fight
Nowhere to run, nowhere to hide nothin's right
My skin is burning when my rock begins to speak
There's something going wrong with me
I am changing rapidly
I'm feeling stronger, more alert, I'm on the move
I smell her scent and I know I will find her soon (soon, soon)
The one to come and free me from this fate
I'll find her, it's not too late, hey, hey
Everytime, the moon shines I become alive, yeah
And everytime, the moon shines I become alive, yeah I'm a beast in the night
I'm on the prowl and I'm hoping to find some light
You call it heaven, I can too it feel the same
Ain't nothing wrong I bin feasting on something brave
A sexy lady who's pure, she has the cure, uh
I hope she can find a man within the beast, hey
I hope she saves me from the curse I have to beat, hey
I hope she figures out a way to save my soul
Yeah, to save my heart, hey Everytime, the moon shines I become alive, yeah
And everytime, the moon shines I become alive, yeah Nananananananana, whoooa
Nananananananana
Nananananananana, whoooa
Nananananananana
I watch the sun collapse
And took up in the clizzoud
I am the lone wolf
Go where I wanna
Let the moon shine be the guide to the lizzight
Even when I stray away the light never left me, uh
I learn to follow my instinct
Blinded about the light,
Rather that than the evil
Feel another place in a room full of people
Try and be the same but you know you're not a sequel You're fate will be whatever it shall be
(be, be, be, be)
We'll fight no more,
I let these things just be (be, be, be) Everytime, the moon shines I become alive, yeah
And everytime, the moon shines I become alive, yeah Nananananananana, whoooa
Nananananananana
Nananananananana, whoooa

Nanananananana
