

# Breaking It Up

Lykke Li

If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you give it a minute, it's wrong  
If you give it a minute, it's gone  
If we're just waiting a second too long  
Darling, I'll leave and you won't come along  
So give me the reason to stay  
Give me the reason to wait  
You know I don't look to get caught  
'Cause darling, we're here but my true love is not  
Breaking it up before it's on  
Breaking it up, it's already gone  
Breaking it up, I didn't mean to fraud  
Breaking it up I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
And I call you baby, I will and I do  
Persuade you in though I know that we're through  
I let you think that I'm yours when I'm not  
Keep you here though I'm ready to drop the last line here  
Breaking it up before it's on  
Breaking it up, it's already gone  
Breaking it up, I didn't mean to fraud  
Breaking it up  
I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
Breaking it up  
Breaking it up  
Breaking it up I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there  
If you're going abroad I can't help you  
If you're crossing the street I might be there

If you're going abroad I can't help you  
If you're crossing the street I might be there
