

# Aftertaste

## Shawn Mendes

Re-Rewind Friday night never forget it  
How you let me go  
No more lies I'll be fine I know where I'm headed  
Probably should've known  
Now you're gonna say pretty "please forgive me"  
Fooled me once, told you twice your gonna regret it  
Now you're all alone, yeah  
Turns out that no one can replace me  
I'm permanent you can't erase me  
I'll help you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste  
Close your eyes you can't hide try to forget me but I'm everywhere  
I'm the smell on your sheets you will regret it when you left me there  
Now you're gonna say "pretty please forgive me" yeah  
Bet it hurts it gets worse you know nobody said it would be fair oh yeah  
Turns out that no one can replace me  
I'm permanent you can't erase me  
I'll help you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste And now there's something in your way  
Cause you threw it all to waste  
And you wonder if you can take back what you did that day and it hurts 'cause  
Turns out that no one can replace me  
I'm permanent you can't erase me  
I'll help you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste  
Truth is that no one can replace me  
I'm permanent you can't erase me  
I'll help you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste  
And the aftertaste
