

Stay Together (feat. Jaheim)

Ledisi

You know I love you right? Love you too
Ain't nobody got what we got, no, no
Whatever, you are my baby
Yes, this here built from the concrete, baby
It don't get no better than this
We've had some ups and downs
Made a lot of bad mistakes
But we've always had some good times
And through it all, you held me down
Baby, you've always held it down, oh yeah
There were times when I was afraid
And wanted you to leave
But you stayed right here by my side
You never let me go
You always stayed around
That's right
You stayed around
And you've been so good to me
And it doesn't matter
I know whatever comes our way
You know you and me
We gon' stay together
Baby, we've been through so much
Our love is so strong, you know
Oh, and you and me
We gon' stay together, oh yeah
We know each other so well
You always seemed to tell
When I need a little kiss and a hug
And that extra kind of loving
You love me like a champion
Baby, you're my superman, yeah, yeah
Baby, girl, you know just what I like
What you do, it makes me lose my mind
I just wanna give to you, make love to you
Take it with you on a rocket
Keep on loving 'til we touch the sky
'Til we touch the sky
And it doesn't matter
I know whatever comes our way
You know you and me
We gon' stay together

Baby, we've been through so much
Our love is so strong, you know
Oh, and you and me
We gon' stay together, oh yeah
I love you, I love you too
You mean the world to me
And I ain't never leaving you
I ain't never leaving you
We're still together
Baby, we're gon' stay together
Baby, we're gon' stay together
Your love, my love, our love, we gon' stay together
Your love, my love, our love, we gon' stay together
Yeah, we gon' stay together
We gon' stay, we gon' stay together, together
