

Better

Betty Who

You look a lot like forever
I'm made of yesterdays
Even if you don't believe me
I couldn't be less afraid
Sometimes you kiss me goodbye
I could stay younger for days
Please don't walk away
Will you hear me when I say
You make it every single day
A little bit better, better, better
You making it better, better, better
You're asking me to stay
Begging me not to run away
But I could never, never, never
I would never, never
Inch your way close to me
Inch and way you look up at me
Will you see me?
You wanna make love
I hate you most when you're silent
Why won't you talk to me?
You hate me most when I've gone away
Just when you're needing me
I wanna kiss you goodbye (I wanna kiss you goodbye)
I could see you in wonderful days
You hear me when I say
You making it every single day
A little bit better, better, better
you making it better better better
you're asking me to stay
begging me not to run away
But I could never, never, never
I would never, never
