

# Coming Home

## Stick Figure

Here I go again I'm thinking about you  
I can't help myself, I can't help myself  
And I apologize to all of you  
I lost myself, I lost myself  
And open up your mind to something new  
Is this the road? We'll never know  
And I have tried to find my way back home  
Well I'm coming home, well I'm coming home Well I remember when you said that I had  
everything I needed  
Took a while, now I finally can see it  
Negativity almost had me defeated  
Well here I am I'm back on my feet and  
Mama, mama won't you look at me  
I grew up fast and my mind is free  
I don't know everything  
But I do remember what you said, you said Life is all about balance and redemption  
Moderation, love and affection  
This meditation and inner reflection  
Keep the faith with your soul's intention  
Let the truth shine through with your actions  
Make your dreams come true with attraction  
Always live your life with no regret  
And don't look back but never forget I got so high just last night, it felt so nice  
I had the time of my life, just last night Well you can come if you wanna, but I'm leaving here  
tonight  
And tell me if you're gonna, 'cause I won't leave you behind  
So you think that you got the answers, you think that you'll never know  
People they keep on talking, the truth is gonna show  
I'm coming home  
I'm coming home  
I'm coming home  
I'm coming home
