

In the New Age

King's X

Humanity is looking for itself
The ancient wisdom taken from the shelf
A light so dark, a heaven that is hell
In the new age, could it already be
In the new age, through the haze I can see
In the new age, what can happen to me
In the new age, I see the blind lead the blind
In the new age, in the search for the mind
In the new age but I know what they'll find
The trap is open no one even cares
The well-disguised one hidden in their stares
In the new age, I see the blind lead the blind
In the new age, in the search for the mind
In the new age but I know what they'll find
Disguise your lying words with love
Depending on the good of man
The truth the symbol of a dove
Will unmask the maker of your plans
In the new age, I see the blind lead the blind
In the new age, in the search for the mind
In the new age but I know what they'll find
In the new age, in the new age
In the new age, in the new age
