

Here I Am (feat. Rebelution)

SOJA

She calls me when t'm in town
I pretend I'm not around
But she sees on her screen i am
So here I am, here I amShe don't call me one and only
No, she just calls me when
She gets lonely, something i do gets
Her there so feel better get wellThere's no love without this pain
There's no one time without again
And there no way that I am
What she need now
I'm just a passing glance
Not a for sure but a chance
And theres no way that I am
What she sees nowShe calls me when I'm in town
I pretend I'm not around
But she sees on her screen I am
So here I am, here I amShe don't call me one and only
No, she just calls me when
She gets lonely, something i do gets
Her there so feel better get wellBackwards now and were back again
Sideway just to find our friends
On this road is changing every
Thing i know upside down inside my head
Let's just talk about something else
The sun gets brighter and takes me alongShe calls me when I'm in town
I pretend I'm not around
But she sees on her screen I am
So here I am, here I amShe don't call me one and only
No, she just calls me when
She gets lonely, something I do gets
Her there so feel better get wellOn these curtains never close
Theres only one way that this goes
We turn in circles and we lose our places
New faces around but no
Replacements I've found
Can we just find a way to go
Back home now...She calls me when I'm in town
I pretend I'm not around
But she sees on her screen I am
So here I am, here I amShe don't call me one and only
No, she just calls me when
She gets lonely, something I do gets

Her there so feel better get well
Don't call me one and only
Just calls me when lonely,
Something I do gets
Her there so feel better get well
