10 Miles Wide

[Escape the Fate](#)

Whoa yeah!You say you're getting closer to last chance of suicide
Tearing at your throat you won't let it die
Left me here for all these days and ripped apart my prideTake my place and look inside
Try to find a place to hide, hide
Lost my faith but don't you cry,
I got a hole inside and it's 10 miles wide (yeah alright)Living on the coast cocktails and telling lies
Gotta fucking curse that's coming to life
You left me here for all these days and ripped apart my prideTake my place and look inside
Try to find a place to hide, hide
Lost my faith but don't you cry,
I got a hole inside and it's 10 miles wide
It's not to late I'm close behind
I've gotta get inside your mind, mind
Lost my faith but don't you cry
I got a hole inside and it's 10 miles wideTake me on,
I'm feeling in the mood
for something dangerous
I found myself again
Take me on,
I'm feeling in the mood
for something dangerous
I found myself againTake my place and look inside
Try to find a place to hide, hide
Lost my faith but don't you cry,
I got a hole inside and it's 10 miles wide
When I lost myself and looked inside
It branded me for life
I can't help myself it's mine to hide
I got a hole inside
It's feeling 10 miles
It's feeling 10 miles
It's feeling 10 miles wideTen miles wide
Ten miles wide
Ten miles wide
